

Plot Review

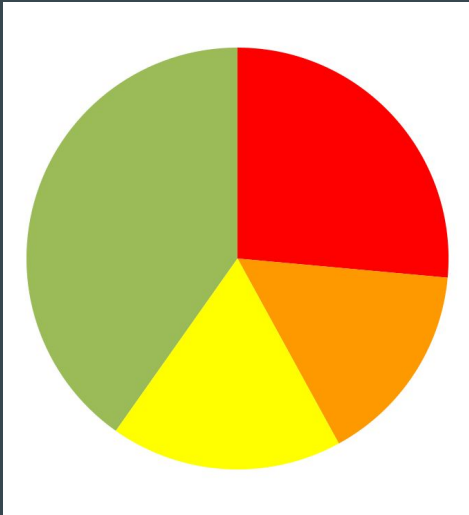

August 7, 2022

Summary

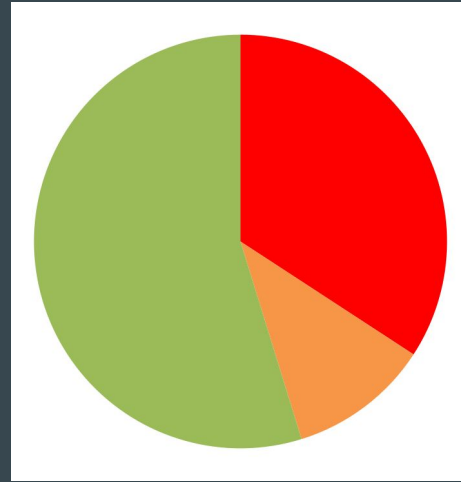

56% of plots have improved, but sadly the plots that had weeds flowering are now seeding. 94 plots achieved a “Lady Bug Award” for two consecutive reviews with no weeds. We have more Green plots than Red and Orange. Well done!!

Next Steps for the Committee

Priority 1

Plots that were RED last month and RED again this month will be sent a notice and 10 days to remove weed seeds.

After which, the committee may take action by clearing the beds and recovering costs from the member

Members should consider if they can realistically continue with the same quantity of plots and voluntarily hand partial allocations back to the committee

Priority 2

Plots that were ORANGE last month and are now RED may be sent a reminder and given 10 days to remove weed seeds.

Members should consider if they can realistically continue with the same number of plots or voluntarily hand back to the committee

Priority 3

Plots that were YELLOW last month and are now RED may be sent a reminder and given 10 days to remove weed seeds

If you need help

**Let the committee know if you need
additional time or assistance.**
